Committee Meetings

- Beijing, Aug 2013

Committee Activities

As discussed during its meeting in Beijing (ICPP, 2013), the committee continued the work in the field of plant quarantine and biosecurity, including but not limited to

- Organizing an session “Pathways: Management, Detection and Simulation” in the

2nd International Congress on Biological Invasions (ICBI 2013);

- Writing a book named Plant Quarantine in Chinese;

- Assisting in several workshops, including China-ASEAN SPS Cooperation - Technical Working Groups (TWG) Meeting on Plant Inspection and Quarantine (28-29 April 2014, Beijing, China), China-US APHIS Pest Risk Analysis (23-28 September 2014, Beijing, China);

- Academic exchange with experts in University of Hertfordshire, Rothamsted Research and East Malling Research on the quarantine pests.
